

OUTPUT:

Enter list: [85, 90, 78, 92, 88]
Enter the index of the grade you want
to view: 10
Invalid index. Please enter a valid index.

Day: 24 October

Task 9: Implement exceptions and exception handling in Python.

Aim: To implement exception and exception handling in Python.

Algorithm:

1. Start the program.
2. Initialize a tuple grade.
3. Prompt the user to enter the index of the grade they wish to display.
4. Attempt to display the grade at the specified index.

Program:

```
# initialize the tuple grade
grade = [85, 90, 78, 92, 88]
```

```
# display the grade list
```

```
print("grade list", grade)
```

```
# input the index of the grade
```

```
index = int(input("Enter the index of the grade"))
```

```
print("The grade at index", index, "is:", grade[index])
```

```
error value error.
```

```
print("Invalid index: please enter a valid index")
```

```
except value error
```

```
print("Invalid input please enter a numerical index")
```

Date: 24/04/21

TASK (9.2) Division calculator with Exception Handling

Aim: write a python program you are developing a calculator program must perform basic arithmetic operation

Algorithm:

- 1 Start
- 2 Prompt the user to enter two numbers
- 3 If numerator and a denominator
- 4 Attempt to divide the num enter by the denominator
- 5 If the denominator is zero, catches the zero
- 6 Division error and display or error

Program:

```
def divide_numbers():  
    try: print ("Enter the numerator:")  
        numerator = float(input("Enter the denominator  
denominator = float(input("Enter the numerator / denominator  
result = numerator / denominator  
print ("Result: ", result)  
except ZeroDivisionError: print ("Division error: Division by zero is not allowed")  
except ValueError: print ("Error: Division by zero is not allowed")  
print ("Error: please enter valid numbers")
```

Result: Thus the program for 'Exception Handling' operations and exception handling executed and verified successfully

OUTPUT:

Enter a number: 10

Enter the denominator: 0

ERROR!

ERROR: division by zero not allowed.
